

THE WIRELESS B2B PROSPECTING KIT

Close Business Accounts on Autopilot

Cold Emails · Call Scripts · Objection Handlers

Lead Tracking · Follow-Up Cadence · Industry Scripts

\$47 — The commission on one closed business account pays this 10x over.

■ SECTION 1: THE COLD OUTREACH EMAIL SEQUENCE

Send these 4 emails over 10 business days. Most deals close on email 3 or 4. Do NOT skip straight to pitching.

■ EMAIL 1 — Day 1: The Soft Introduction

Subject: Quick question about [Company Name]

Hi [First Name],

I work with a lot of [industry] businesses in the [City] area and noticed [Company Name].

Quick question — how many lines does your team currently run for business communication?

I'm not here to sell you anything today. Just trying to understand if there's a fit.

Worth a quick 10-minute call?

[Your Name] | Verizon Business | [Phone]

■ EMAIL 2 — Day 3: The Value Drop

Subject: The thing most [industry] businesses miss on wireless

Hi [First Name],

Most small business owners I talk to are paying consumer-level rates for business lines. They don't know they qualify for

- Priority network access (faster data when towers are busy)
- Business account support (no waiting on hold)
- Consolidated billing for the whole team

Has anyone walked you through what you'd actually qualify for?

[Your Name] | [Phone]

■ EMAIL 3 — Day 6: The Case Study

Subject: What I set up for a [similar company]

Hi [First Name],

Last month I helped a [similar industry] company in [city] move 8 lines over to Verizon Business.

They cut their monthly bill by \$180 and eliminated dropped calls in the field — their techs were on [competitor] and losing

I'd love to run you a quick comparison. 15 minutes max, zero commitment.

Are you free [Day] or [Day] this week?

■ EMAIL 4 — Day 10: The Last Touch

Subject: Last message — didn't want to assume

Hi [First Name],

I've reached out a couple times — totally understand if the timing isn't right.

If your wireless situation changes, or you want to compare what you're paying now to what Verizon Business offers, I'm

No pressure, no cold call — just here when you need it.

[Your Name] | [Phone] | [Email]

■ SECTION 2: THE LINKEDIN DM SCRIPT

LinkedIn is the #1 channel for business decision-makers. This sequence gets you from connection to booked call in 3 messages.

■ CONNECTION REQUEST NOTE (300 chars)

"Hey [First Name] — I noticed [Company Name] is growing fast. I work with a lot of [industry] companies on business wireless. Would love to connect and share some resources. No pitch, I promise."

■ FOLLOW-UP AFTER THEY ACCEPT

"Thanks for connecting! Quick question — are you handling wireless/telecom for the business, or is there someone else I should reach out to? I have some data on what similar [industry] companies are paying that might be worth 5 minutes of your time."

■ IF THEY REPLY POSITIVELY

"Perfect. I can do a quick comparison against your current plan — no switching needed, just a look at what you might be leaving on the table. Are you free for a 15-minute call [Day] at [Time]? I'll keep it tight."

■ SECTION 3: THE COLD CALL FRAMEWORK (Under 90 seconds)

You have one goal on a cold call: book the appointment. NOT explain Verizon. NOT pitch features. BOOK. THE. CALL.

■ OPENING (10 seconds)

"Hey [First Name], this is [Your Name] from Verizon Business — quick question for you."

[PAUSE — let them say "sure" or "what is it?"]

■ THE PIVOT (20 seconds)

"I work with a lot of [industry] businesses in [City] on wireless. We've been helping companies cut their monthly wireless bill while upgrading to Verizon's business network. Most don't know they qualify for it."

■ THE ASK (15 seconds)

"Do you have 15 minutes this week to take a look at what you're currently paying vs. what you'd get with us? I can usually find \$100-200 a month for companies your size."

■ IF THEY SAY YES

"Perfect. What works better — Tuesday or Wednesday? Morning or afternoon?"

[BOOK IT. Get off the phone. Do not keep talking.]

■ SECTION 4: BUSINESS ACCOUNT DISCOVERY QUESTIONS

Ask these in order. Every answer gives you ammo for your close. Take notes.

#	LABEL	WHAT TO ASK
1	1. HOW MANY LINES?	How many team members need a business phone line?
2	2. CURRENT CARRIER?	Who are you with now, and how long have you been on that plan?
3	3. MONTHLY SPEND?	Do you know roughly what you're paying per month for wireless? Per line?
4	4. PAIN POINTS?	Any issues with coverage, dropped calls, or billing that's been frustrating?
5	5. DEVICE STATUS?	Are you leasing phones through your carrier or do you own them outright?
6	6. CONTRACT STATUS?	Are you currently under contract? When does it end?
7	7. DECISION MAKER?	Are you the one who makes telecom decisions, or do you work with someone else?
8	8. TIMELINE?	If I show you significant savings, is this something you'd want to move forward with?

NOTES FROM DISCOVERY CALL

■ ■ SECTION 5: OBJECTION HANDLERS — BUSINESS EDITION

OBJECTION: "We're under contract."

YOU SAY: "Totally understand — most of my clients were too. Two things: (1) I can check if your ETF makes switching worth it right now, and (2) we can lock in a Verizon rate today and schedule the switch for when your contract ends. Want me to run those numbers?"

OBJECTION: "My IT department handles this."

YOU SAY: "Perfect — can you connect me with them? I've put together a business comparison report that makes it easy for IT to evaluate in 15 minutes. What's the best way to reach them?"

OBJECTION: "We're not interested."

YOU SAY: "Totally get it. Quick question before I let you go — are you not interested because you're happy with the price, the coverage, or both? I only ask because I find that most businesses haven't compared rates in 2+ years, and Verizon Business pricing has changed a lot."

OBJECTION: "We don't need more lines."

YOU SAY: "I'm not trying to add lines — I'm trying to see if you're overpaying for the lines you already have. Takes 10 minutes. Would that be worth it?"

OBJECTION: "Send me an email."

YOU SAY: "I can do that. Just so I send the right thing — is price the main factor, or is it more about coverage reliability? And what's the best email? I'll keep it one page."

■ SECTION 6: THE 30/60/90-DAY FOLLOW-UP CADENCE

80% of B2B deals close on follow-up #5 or later. Most reps quit at #2. This is your edge.

Touchpoint	Timing	Channel	Message Angle
Initial outreach	Day 0	Email + LinkedIn	Introduction + question
Follow-up 1	Day 3	Email	Value drop / stats
Follow-up 2	Day 7	Phone call	Case study + ask for call
Follow-up 3	Day 10	Email	Last touch, keep door open
Check-in 1	30 days	Email	"Wanted to check back in — anything changed?"
Check-in 2	60 days	LinkedIn DM	"Contract up yet? I have some new pricing."
Check-in 3	90 days	Phone call	"Quarterly check-in — 5 minutes?"

■ SECTION 7: B2B LEAD TRACKING SHEET

[illegible]

■ SECTION 8: THE CONSTRUCTION & TRADES INDUSTRY SCRIPT

Construction, HVAC, plumbing, electrical — these businesses have crews in the field and need reliable coverage. They're also notoriously underserved by their current wireless reps. This is your niche.

■ COLD EMAIL — CONSTRUCTION/TRADES

Subject: Wireless for [Company Name] field crews

Hi [First Name],

I work with a lot of construction and trades companies in [City] who've had trouble with wireless coverage on job sites — dropped calls mid-bid, slow data when teams are submitting photos from the field.

Verizon Business has some specific coverage solutions built for field crews. I'd love to show you what other contractors in [City] are doing.

Worth a 10-minute call? I can usually find \$150-300/month for a crew your size.

[Your Name] | Verizon Business | [Phone]

■ CALL SCRIPT — TRADES-SPECIFIC PIVOT

"Hey [First Name] — quick question. Do your field guys ever deal with dropped calls",
"or slow data on job sites? I'm asking because I've helped a few [contractors/plumbers/",
"electricians] in the area get on Verizon's extended coverage network — it's specifically",
"built for areas where the big networks go spotty."

"I can show you in 15 minutes. What does your schedule look like this week?"

■ KEY PAIN POINTS TO PROBE

- Dropped calls on job sites or in suburban areas
- Crews submitting photos/forms but uploads are slow
- Billing issues — personal lines mixed with business

- Fleet vehicles that need hotspots (tablets in trucks)
- Multiple owners on different carriers, no unified plan

YOU'RE READY.

One closed 10-line business account = \$400-600+ commission.

That's more than 10x what you paid for this kit.

The only thing left is to make the calls.
