Ultimate Monthly Budget Planner

Monthly Budget Planner

Take Control of Every Dollar — Every Month
By Warren Davis | TheBlueprintDaily

HOW TO USE THIS PLANNER

- 1

Fill in your income section first

Know exactly what's coming in before you spend anything.
- 2

List every fixed expense

Bills that don't change month to month.
- 3

List every variable expense

Groceries, gas, dining out — the stuff that fluctuates.
- 4

Subtract total expenses from total income

This gives you your remaining dollars.
- 5

Assign every leftover dollar a job

Savings, debt payoff, investments — zero leftovers.

The goal: Zero-based budgeting — every dollar has a name. Income minus expenses = zero.

TIPS FROM WARREN

1. Pay Yourself First

Before any variable spending, move your savings/debt payment the day you get paid.

2. The \$10 Rule

Before any non-essential purchase over \$10, ask: 'Is this more important than my goal?'

3. No-Spend Days

Pick 2 days per week where you spend \$0 outside of bills.

4. Weekly Check-Ins

5 minutes every Sunday reviewing spending = no surprises at month-end.

5. Automate Everything

Bill autopay, savings transfers, debt payments. Remove the decision entirely.

Every dollar you control today is a dollar working for your future — not against it.
