

Monthly Budget Planner

Take Control of Every Dollar — Every Month

By Warren Davis Digital

HOW TO USE THIS PLANNER

1. Fill in your income section first — know exactly what’s coming in.
2. List every fixed expense (bills that don’t change).
3. List every variable expense (groceries, gas, eating out, etc.).
4. Subtract total expenses from total income.
5. Whatever is left = your “power number” — the money you control.
6. Assign every leftover dollar a job (savings, debt, investments).

The goal: **Zero-based budgeting**. Income minus expenses equals zero — every dollar has a name.

BUDGETING TIPS FROM WARREN

1. **Pay yourself first.** Before any variable spending, move your savings/debt payment the day you get paid.
2. **The \$10 rule.** Before any non-essential purchase over \$10, ask: “Is this more important than my goal?”
3. **No-spend days.** Pick 2 days per week where you spend \$0 outside of bills.
4. **Weekly check-ins.** 5 minutes every Sunday reviewing spending = no surprises at month-end.
5. **Automate everything you can.** Bill autopay, savings transfers, debt payments. Remove the decision.
